ProMIS' commitment in supporting Synergies and complementarities among EU4Health and other initiatives

Le sinergie tra Fondi Strutturali e altri programmi di finanziamento UE

Luglio 2022

GIURI

The GIURI is an informal platform that brings together the liaison and representing the interests of Italian stakeholders at the European institutions, operating in the field of R&I

"**Synergies between Structural funds and other European funding programmes"**
Launched during an event organised with DG RTD & DG REGIO and published on APRE website it focuses on the ways of applying the six types of synergies: alternative, sequential, cumulative, voluntary transfers, partnerships and teaming.

Chapter 9 is dedicated to *'The importance of synergies in the health and social sector: examples and opportunities'.*

➢ **EU4Health**: Increasing the capacity of National Focal Points (NFP) – NFP4Health
➢ **Horizon Europe**: European Partnership on transforming health and care systems – THCS
➢ **Technical Support Instrument**: Digital skills for Digital Transformation of Health and Care System

NFP4Health
Joint Action on Increasing Capacities of National Focal Points

Health Professionals' and the "DigitAl team" SkillS advancement - H-PASS

H-PASS intends to design and implement a training programme with specific modules for each of the 6 pilots to be carried out in Italy, Cyprus, Greece, Hungary, Lithuania and Romania

PURPOSE: to improve the transversal skills of clinical staff and to ensure up-to-date knowledge for health professionals, especially in the digital context

ROLE OF ProMIS
ProMIS is leading **WP6 'Sustainability & Synergies'**

Ecosystem of stakeholders, aimed at improving and upgrading the HWF's competences. WP6 ensures **synergies with other EU initiatives, ongoing projects, EU good practices, strategic programmes and resources**

| ENDERS ▼ | HOW TO PARTICIPATE ▼ | PROJECTS & RESULTS | WORK AS AN EXPERT | SUPPORT ▼ |

- training plan explaining how training will be organised: selection of participants, selection criteria, duration, forms of training (per hours/per week),
- communication and dissemination plan of these training activities, including by using a userfriendly platform;
- overall evaluation plan ;
- if relevant, possibility of microcredentials to be provided to each trainee attending the training courses and addressing the specific skills developed certificate of training (also provided online);
- high quality supporting training materials prepared by the trainer.
- training programmes and materials should be available on line for future potential use and dissemination in countries not participating in the proje

3) Mechanisms of co-operation of European professional associations with national associations and national health authorities.

4) Monitoring mechanisms ensuring structured and regular reporting on results and impacts of projects.

5) Project proposals should, if relevant, demonstrate complementarities with:

- Reforms and investments included in Resilience and Recovery Plans,
- The Flagship initiative Digital Skills for Digital Transformation of Health and Care Systems financed by the Technical Support Instrument (TSI);
- Initiatives supported under the Horizon Europe programme, Healthy citizens 2.0: supporting digital empowerment and health literacy of citizens,
- Digital education programmes supported under the Digital Europe Programme,
- Training initiatives co-funded by the European Cohesion Funds.
- Other relevant training initiatives.

Digital skills for Digital Transformation of Health and Care System

TSI Purpose flagship: support for the design of a National/Regional Roadmap for Digital Skills of the health workforce to support the digital transformation of health and care systems.

Measures to facilitate the digital transformation of healthcare systems

➢ Standards for quality assurance and capacity building

➢ Assessment of the status of demand and supply of health workforce capacity in view of related recovery and resilience plans, reforms and investments

➢ Benchmarking and review of actions based on state-of-the-art mapping of digital skills training, governance, policies and legislation

➢ Piloting and planning of actions

➢ **Establishing coordination mechanisms for synergies with other EU funding instruments and national programmes**

➢ Establishing e-Government Tools

«True excellence is a product of synergy»,
M. Wilberg
