

EU4HEALTH 2022 WORK PROGRAMME

INFORMATION SESSION

ON A CALL FOR PROPOSALS TO SUPPORT MEMBER STATES AND OTHER RELEVANT ACTORS TO IMPLEMENT RELEVANT RESULTS OF INNOVATIVE PUBLIC HEALTH RESEARCH IN RELATION TO VACCINATION AGAINST COVID-19

Tuesday 17th January 2023, 10.00 – 12.30 CEST, Brussels time

We invite you to join this webinar.

The COVID-19 pandemic created a need for fast vaccination of entire populations in Member States, which was a challenge of historic dimensions for many countries, as it required a multitude of steps to be taken successfully. These range from the design of vaccination plans to the set-up of appropriate infrastructure and easily accessible, sufficiently resourced vaccination services. All the while, to communication and outreach activities to ensure high uptake of the vaccines, including activities to address vaccine hesitancy and disinformation on related risks. The novelty of the vaccines to be administered and the pandemic context made the task even more demanding. Hence, there is a need to gain efficiency and develop strategies in terms of large-scale vaccination.

The action aims to support Member States and relevant stakeholders to implement the results of recent and relevant research in relation to vaccination against COVID 19.

The EU4Health programme provides funding to eligible entities from Member States, associated third countries, international organisations, NGOs and the private sector in the form of grants. The European Commission and the Health and Digital Executive Agency (HaDEA) will manage the programme.

The information session is organised by HaDEA with the participation of DG Santé to present the policy context, objectives and expected impact as well as the procedure for this call.

[Register to this Information Session following this link](#)

Once registered, you will receive the link and the registration ID to join the webinar on Tuesday 17th January 2023.
