

EHFG 2023

Workshop: (EU4)Health in all programmes

28th September 2023, 8:45 – 9:45

BAD HOFGASTEIN, AUSTRIA & ONLINE

In the scope of its Work Package 5, focused on cross-programme synergies for health, the NFP4Health project is organising a session in the framework of this year's European Health Forum Gastein, entitled **(EU4)Health in all programmes - Harnessing synergies for a resilient future**. The hour-long workshop aims to explore the role of EU4Health and its complementary programmes in working towards the realisation of a European Health Union, highlight areas ripe for synergistic action on health and well-being, and discuss challenges and barriers encountered along the way together with all relevant stakeholder groups of European programming. Find out more and register to the conference (on-site or online) at: ehfg.org

8:45 - 8:50 Welcome

8:50 – 9:00 Scene-setting input on the EU4Health programme and its role in working towards a European Health Union in concert with other European programmes and strategies

9:00 - 9:40 Interactive discussion with panelists and audience:

- What are the biggest current synergistic opportunities for health between different EU-funds and programmes, and how can stakeholders best make use of them?
- Which are the most notable barriers faced by different stakeholders (national authorities, academia, civil society organisations among them) in harnessing European synergies for health beyond the dedicated health programmes?
- Which concrete topics hold the biggest future need and potential for synergistic action at European level across different policy- and programming areas?

Panelists:

Krisztina Biró, State Secretariat for Health, Hungarian Ministry of Interior

European Commission, DG SANTE (tba)

European Commission, DG RTD (tbc)

Caroline Costongs, Director, EuroHealthNet

Miklós Szócska, Director of the Health Services Management Training Centre, Semmelweis University

9:40 – 9:45 Closing words

Agenda version: August 14, 2023
The presentation is part of the "NFP4Health" which has received funding from the European Union's Health Programme (2014-2020) under grant agreement No 101035965.
